

Hitesh Jogiya

Frontend Developer | Angular • React • Next.js | +91 70431 04590 | hiteshjogiya2017@gmail.com

Professional Summary

Frontend Developer with 4+ years of experience building scalable enterprise web applications across finance, accounting, and healthcare domains. Strong expertise in Angular, React, Next.js, TypeScript, JavaScript, Tailwind CSS, Supabase, Vercel, NgRx, Angular Signals, Signal Store, and AG Grid. Experienced in developing reusable component libraries, implementing pixel-perfect Figma designs, optimizing performance, and delivering responsive, production-ready applications.

Technical Skills

Frontend: Angular (v14–18), React, Next.js, TypeScript, JavaScript, HTML5, CSS3, SCSS, Tailwind CSS

State Management: NgRx, Angular Signals, Signal Store, React Hooks

Backend & APIs: Supabase, REST APIs

Tools: Git, GitHub, Bitbucket, Vercel, VS Code

UI: AG Grid, Responsive Design, Reusable Components, Performance Optimization

Professional Experience

Xenett — Software Engineer (Dec 2024 – Jan 2026)

- Developed and maintained enterprise accounting software using Angular 18 and TypeScript.
- Implemented scalable state management using NgRx, Angular Signals, and Signal Store.
- Built reusable shared components to improve development speed and maintainability.
- Extensively worked with AG Grid for large datasets, advanced filtering, reporting, and financial analysis.
- Delivered core modules including Settings, Company Listing, Company Dashboard, Common Filters, Custom Fields, Financial Review, Reports, and Findings in Profit & Loss.
- Optimized rendering performance and improved overall application responsiveness.

Radixweb — Associate Software Engineer (Jan 2022 – Aug 2024)

- Developed frontend modules for a Clinical Trial Management System using Angular and TypeScript.
- Worked on Finance, Role Management, Study, Task, Visit, and Subject modules.
- Built reusable UI components, dynamic forms, and responsive layouts.
- Integrated REST APIs and collaborated with backend teams to deliver business features.
- Improved application performance, maintainability, and code quality through component-based architecture.

Project

Modern E-commerce Boilerplate (Next.js)

Designed and developed a production-ready e-commerce platform using Next.js, React, TypeScript, Tailwind CSS, Supabase, and Vercel. Built secure authentication, product catalog, category management, advanced search and filtering, wishlist, shopping cart, coupon support, checkout flow, order management, user profile, responsive design, reusable UI components, SEO optimization, image optimization, server-side rendering, admin dashboard for managing products, categories, orders and users, role-based access, analytics widgets, and scalable project architecture suitable for SaaS and real-world business applications.

Education

B.Tech in Information Technology — RK University (2018–2022) | CGPA: 7.9

Certifications

- AWS Academy Graduate – Cloud Foundations
- FLY (Finding Leader in You) – CMI Scholar Program
